

Film manufacturing machines manufactured by General Plastics Europe.

General Plastics is your leading expert in plastic processing machinery for production of high quality film with very competitive prices. This enables our energy-saving patented drives, which provide high-speed production and great precision. We design and manufacture Film Blowing Machines for single or multi layer film and Multi-layer Cast Film Lines for all possible applications. General Plastics manufactures many kinds of stretch film extruders, barrier film extruders and other, by the output of 15-700kg/hr and a max. film width of 12 meters.
